

**DESIGN AND ANALYZE THE FRAMEWORK
FOR PREVENTING CYBERBULLYING IN
SOCIAL NETWORKING SITES USING DEEP
LEARNING MODEL**

A PROJECT REPORT

Submitted by

MURALI R (621719104024)

PRAVEEN P (621719104032)

SUBASREE M (621719104045)

SUDHARSAN S (621719104046)

in partial fulfillment for the award of the degree

of

BACHELOR OF ENGINEERING

in

COMPUTER SCIENCE AND ENGINEERING

MUTHAYAMMAL COLLEGE OF ENGINEERING,

RASIPURAM.

ANNA UNIVERSITY : CHENNAI 600 025

MAY 2023

ANNA UNIVERSITY : CHENNAI 600 025

BONAFIDE CERTIFICATE

Certified that this project report “**DESIGN AND ANALYZE THE FRAMEWORK FOR PREVENTING CYBERBULLYING IN SOCIAL NETWORKING SITES USING DEEP LEARNING MODEL**” is the bonafide work of “**MURALI R (621719104024), PRAVEEN P (621719104032), SUBASREE M (621719104045), SUDHARSAN S (621719104046)**” who carried out the project work under my supervision.

External Examiner

DECLARATION

We affirm that the project work titled **“DESIGN AND ANALYZE THE FRAMEWORK FOR PREVENTING CYBERBULLYING IN SOCIAL NETWORKING SITES USING DEEP LEARNING MODEL”** being submitted in partial fulfillment for the award of **B.E(Computer Science and Engineering)** is the original carried out by us. It has not formed the part of any other project work submitted for award of any degree, either in this or any other University.

(Signature of the candidates)

MURALI R (621719104024)

PRAVEEN P (621719104032)

SUBASREE M (621719104045)

SUDHARSAN S (621719104046)

I certify that the declaration made above by the candidates is true to the best of my knowledge and belief.

(Signature of the Supervisor)

Mrs.M.Gomathi,M.E.,

Department of Computer Science and Engineering,

Muthayammal College of Engineering,

Rasipuram - 637408.

ACKNOWLEDGEMENT

First of all, we would like to thank the Almighty for blessings and our parents for their moral support given to us to complete our project successfully.

Our hearty thanks to **Shri R.Kandasamy**, Chairman, Muthayammal Educational Trust & Research Foundation.

We express our hearty thanks to **Dr.K.Gunasekaran, Ph.D.**, Secretary and Managing Trustee for providing the necessary facilities.

We would also extend our deep gratitude and thanks to **Dr.P.Venugopal,Ph.D.**, Principal of Muthayammal College of Engineering for his kind support and guidance.

We would like to express our special thanks and gratitude to **Dr.R.Nallusamy,M.E, Ph.D.**, Dean of CSE & AIDS for his valuable support.

We extend our deep pleasure and sincere thanks to **Dr.C.Suganthi, Ph.D.**, Head of the Department of Computer Science and Engineering for her guidance and kind co-operation.

We wish to extend our sincere thanks to **Mrs.M.Gomathi, M.E.**, Department of Computer science and Engineering for her guidance to complete the project.

We express our heart full gratitude and sincere thanks to **Mr.D.Jotheeswaran, M.Tech.**, project coordinator for his valuable support.

ABSTRACT

Cyberbullying is bullying that takes place over digital devices like cell phones, computers, and tablets. Cyberbullying can occur through SMS, Text, and apps, or online in social media, forums, or gaming where people can view, participate in, or share content. Cyberbullying includes sending, posting, or sharing negative, harmful, false, or mean content about someone else. It can include sharing personal or private information about someone else causing embarrassment or humiliation. The content an individual share online – both their personal content as well as any negative, mean, or hurtful content – creates a kind of permanent public record of their views, activities, and behavior. To avoider detecting cyberbullying attacks, many existing approaches in the literature incorporate Machine Learning and Natural Language Processing text classification models without considering the sentence semantics. The main goal of this project is to overcome that issue. This project proposed a model LSTM - CNN architecture for detecting cyberbullying attacks and it used word2vec to train the custom of word embedding. This model is used to classify tweets or comments as bullying or non-bullying based on the toxicity score. LSTM networks are well-suited to classifying, processing and making predictions based on time series data, since there can be lags of unknown duration between important events in a time series. A convolutional neural network (CNN) is a type of artificial neural network and it has a convolutional layer to extract information by a larger piece of text and by using this model LSTM- CNN achieve a higher accuracy in analysis, classification and detecting the cyberbullying attacks on posts and comments.
